

HARNESSES & CARRYING SOLUTIONS

Looking for a smart way to carry your 2-way radio, *Talk Through Your Ears®* control unit, lapel speaker mic, or other accessories? Let us help you with a variety of carrying solutions. We offer low-profile harnesses and individual equipment pouches in belt-worn or chest-worn configurations. Made in the USA from heavy duty ballistics nylon, our products are industry-tough and designed to last.

Chest Harness

- Versatile front panel allows you to attach a variety of accessories; make it your own!
- Sturdy adjustable size straps with elastic waist and heavy duty buckles
- Ergonomic design holds harness tight and straps flat to body
- Can be used as front or back carrying solution
- Antenna loops secure long “whip” antennas close to the shoulder strap
- Accessible pocket provides storage for cords and other small items

Sling Harness

- Fully adjustable shoulder strap to fit both short and tall; adjustments are fast and easy
- Can be worn over left or right shoulder
- Can be worn inside or over most jackets; easy to use with large outerwear
- Reflective material covers the entire length of the shoulder strap for high visibility in low light environments
- Heavy duty belt clip secures sling to belt

Radio Holster

- Elastic closure accommodates most 2-way radios
- Extension strap available for extra long radio models
- Rugged belt clip or easy-snap belt loop compatible with most belts and MOLLE-style vests

Control Unit Pouches

- Specially designed for CavCom’s *Talk Through Your Ears®* control units
- Lightweight, low-profile
- Rugged closures
- Easy access to accessory ports for quick connections
- Heavy duty covered belt clip for comfort and secure fit
- Options available for wearing on belt/waistband or with chest harnesses
